

Wall-mounted solar installation distance specifications

How far from the wall can a solar panel be mounted?

Without projecting a panel beyond 200mm from the wall, from the wall, you can mount a typical panel with dimensions 170cm by 110cm at around 80°. A wall-mounted panel gives much better consistency and peaks in spring and autumn compared to the summer. Yearly production ~290kWh. There are multiple options for mounting panels on a wall.

How far can solar panels be installed?

For pitched and wall-mounted installations, solar panels must not extend more than 200mm perpendicular to the surface of the roof or wall. For both pitched and flat roof installations, panels must be installed at least 1 meter away from the building's external edges.

What angle should wall-mounted solar panels be placed?

Where possible, wall-mounted panels should be tilted to a 60-degree angle, which is the optimal angle for capturing sunlight when the sun is low in the sky. It's also best to place wall-mounted solar panels on a south-facing wall, as this will expose them to the most direct sunlight throughout the day.

Can solar panels be mounted on walls?

There are purpose-built solutions on the market for mounting solar panels on walls. These are costly, and you need to buy them for each panel. The added cost is an important consideration. However, the advantage of these systems is that you can angle your panels more easily, as this functionality is built-in.

What are the requirements for solar panels?

In an elaboration of the requirements, the planning portal offers a list of mandatory requirements concerning roof and wall-mounted solar panels. Panels should not be installed above the highest part of the roof (excluding the chimney) and should project at most 200mm from the roof slope or wall surface.

How long does it take to install solar panels?

It'll usually take two to three days for wall-mounted solar panels to be installed - but this can vary, depending on the size of the property, the number of panels being installed, and the height of the solar panel system.
