Are lithium-ion batteries the future of battery technology?

Because lithium-ion batteries are able to store a significant amount of energy in such a small package, charge quickly and last long, they became the battery of choice for new devices. But new battery technologies are being researched and developed to rival lithium-ion batteries in terms of efficiency, cost and sustainability.

Are lithium-ion batteries a good choice for energy storage?

Although battery energy storage accounts for only 1% of total energy storage, lithium-ion batteries account for 78% of the world's battery energy storage system as of 2021. Lauded for their high energy density, lithium-ion batteries dominate the battery market. The field of lithium-based batteries is continually developing.

Are lithium-free metal batteries a viable substitute for lithium-ion batteries?

\*Prof. Rakesh Kumar Sharma. Email: [email protected] Lithium-free metal batteries are currently emerging as a viable substitute for the existing Li-ion battery technology, especially for large-scale energy storage, ease of problems with lithium availability, high cost, and safety concerns.

What are non lithium batteries?

The academic database "Web of Science" was used with keywords related to non-lithium battery technologies, namely sodium-ion batteries, potassium-ion batteries, magnesium-ion batteries, aluminium-ion batteries, zinc-ion batteries, and calcium-ion batteries.

What are lithium-ion batteries used for?

Lithium-ion batteries power our world. Handheld devices, electric vehicles (EVs) and aerospace applications have widely adopted lithium-ion technology [1,2,3]. With the shift towards renewable energy, lithium-ion energy storage technology is also being integrated into our electrical grid.

Are alternative batteries better than lithium-ion batteries?

However, most of the alternative battery technologies considered have a lower energy density than lithium-ion batteries, which is why a larger quantity of raw materials is typically required to achieve the same storage capacity.
