

What does it mean to turn on the new energy battery

What's new in power & battery settings?

As part of the update, on the "Power & battery" page, the "Battery usage" settings are now being renamed to "Energy & battery usage." Also, the section now shows energy usage data as well as battery level.

Why do given energy batteries discharge?

The batteries will discharge to meet that energy demand so you are not paying for that additional energy from your supplier. This is the standard logic for all GivEnergy Battery systems, whether you have an AC Coupled or Hybrid Inverter installed in your home.

What's new on the 'power & battery' page?

The new changes for the "Power & battery" page are still under development, and @PhantomOfEarth has spotted them on Twitter. If you want to get hands-on with the new settings, you can use a third-party tool called "ViveTool," created by Rafael Rivera and Lucas on GitHub, to enable the experience on your computer.

What happens if a battery is changed?

When the battery is changed, vehicle data such as the navigation settings, telephone book, radio station, electronic seat position, etc. are remembered. Another advantage: If a battery is replaced with the Memory Saver, it is usually not necessary to re-register.

How do I enable the new energy and battery usage settings?

To enable the new energy and battery usage settings, use these steps: Open GitHub website. Download the ViveTool-vx.x.x.zip file to enable the new energy settings. Double-click the zip folder to open it with File Explorer. Click the Extract all button. Click the Extract button. Copy the path to the folder. Open Start.

How does electricity change during a day?

Throughout a typical day, electricity demand fluctuates, often making it necessary to increase power from on-demand sources such as natural gas power plants. Energy sources such as solar and wind produce variable amounts of power depending on the time of day and weather. Hydroelectric power often changes with the seasons.
