Next I ask, Well, if the motor can draw that much and the ESC can allow 80amps more, I need a battery that can deliver at least 200amps more than the ESC can deliver. If you run budget packs on a motor/ESC combo that will struggle to deliver what the motor wants, you can do one or all of these three things. 1. Blow your batteries 2. Blow your ...

SCCM12048-II MPPT Solar Charge Controller Maximum charging current up to 60A, Integrated intelligent slot compatible with SNMP/MODBUS communication.
