

Which battery is best for a car?

Absorbent Glass Mat (AGM)batteries are the most advanced batteries you'll find in a car right now,unless you're driving a plug-in hybrid or a fully electric vehicle. AGM batteries are also suitable for cars with start-stop systems,but they offer the potential for many more starts than an EFB battery and will have a longer service life.

Are car batteries one size fits all?

Car batteries aren't one size fits all. So before you purchase a battery,you'll need to make sure it will actually fit into the space for it. There are battery size groupings to make this more simple. For example,if you know your existing battery is the 027 type,then you'll know you need another 027 battery.

What type of battery do I need if my car has start-stop?

We've discussed the different types of battery you have to choose from,and you're aware that if your car has start-stop then you'll need an AGM or EFB. Those two batteries are the most powerful,longest lasting and best quality. And with that comes higher cost.

How do I choose the best car battery?

With a car battery warranty that speaks for its quality,Amaron ensures you're always on the move. Overall,picking the best car battery isn't merely a matter of brand or price--it's about understanding your vehicle's unique requirements and ensuring the chosen battery aligns with them. Choose wisely,and your car will serve you well.

What are the different types of car batteries?

If you browse new car batteries for sale, you'll see a plethora of options - and the sheer volume of choice can be overwhelming. Lead-acid batteries, absorbent glass mat batteries, silver calcium batteries, enhanced flooded batteries, lithium-ion batteries, and more, all feature differing chemistries and construction.

Which battery should I get if my car has a stop-start system?

We'll keep this simple. If your car DOES HAVE a stop-start system you must get either of no.2 or no.3 on that list,that is you must get an EFB or an AGM battery. If your car DOES NOT HAVE a stop start system,then you can choose from 1,2,or 3. So you can get any of a traditional Flooded battery or a an EFB battery or an AGM battery.
