

# What new energy batteries are there in Italy

Does Eku Energy have a battery storage agreement in Italy?

The agreement, signed on 28th June 2023, secures Eku Energy exclusivity over 1GW of battery storage projects in Italy. As part of the agreement, Eku Energy is already funding projects with a combined capacity in excess of 100MW in the South of Italy, a region with high levels of renewable penetration and an increasingly congested grid.

When will energy storage capacity auction start in Italy?

The energy minister of Italy has signed a decree paving the way for an energy storage capacity auction to kick off in the first half of 2025.

How many BW ESS projects are there in Italy?

BW ESS and ACL Energy have announced an expansion of their stand-alone BESS project portfolio in Italy, bringing their total development pipeline to 14 projects representing 2.9 GW of capacity across Italy's North and South electricity zones.

How will Italy support energy storage?

Italy is one of Europe's fastest growing energy storage markets and recently introduced mechanisms to support this nascent sector. To meet its decarbonisation goals, it set out the need to build 9 GW of new grid-scale energy storage and upped its renewables targets with the aim of having 65% of electricity from green energy by 2030\*.

Is Italy a good place to invest in energy storage?

Italy is an incredibly interesting and fast-growing market for renewables and there's significant untapped potential in the energy storage sector. "Big batteries like the ones we're developing with this new joint venture make the most of when it's sunny and windy by storing abundant green energy and releasing it back into the grid when it's needed.

Is Italy a key market for Eku Energy?

Sandra Grauers Nilsson, CEO of Eku Energy commented: Italy is a key market for Eku Energy as we continue our global expansion, and we're thrilled to have partnered with Renera Energy to help meet the country's growing need for energy storage.

Europe's battery energy storage system market, long dominated by the UK, is set to welcome a new leadership contender in 2024. Italy's transmission system operator, Terna, is planning to launch a new tender process that experts say could see Italy overtaking Britain on energy storage by 2030.

Particular attention is paid to the integration of renewable energy in the Puglia region, where a project based

## What new energy batteries are there in Italy

on hydrogen storage is expected to match energy supply and demand and optimise the electricity generated by intermittent renewable energy sources while ensuring security and stability of the power distribution network. The project is ...

BW ESS and ACL Energy have announced an expansion of their stand-alone BESS project portfolio in Italy, bringing their total development pipeline to 14 projects representing 2.9 GW of capacity across Italy's North and South electricity zones.

In the near future, southern Italy will be a key player in the production of accumulators for electric vehicles, a cutting-edge sector in which Italy is at the forefront in Europe. Two Italian Gigafactory projects are already in the pipeline, the first in Molise, at the Stellantis plant in Termoli, and the other in Campania, at the FAAM plant associated with the listed Seri ...

The first phase of the scheme is specifically targeting lithium-ion battery energy storage system (BESS) projects while a second auction will be carried out for pumped hydro energy storage (PHES) projects, Terna's two "reference" technologies chosen for their technological and commercial maturity.

One of those projects by Italtel Spa aims at creating in Italy one of the largest gigafactories in Europe for the production and storage of lithium-ion batteries for electric vehicles. The plant on a 100-hectare site in ...

Italy is advancing its renewable energy goals with the help of grid-scale batteries, essential for stabilizing the grid as more solar and wind power comes online. Renesys Energy's new facilities will produce the advanced energy storage systems needed to support this transition.

Located in central Italy, the system will be strategically positioned within the perimeter of the existing combined cycle gas plant, enabling the connection of the battery storage system with the existing power plant, ...

The company has developed a variety of battery energy storage systems for home, industrial and commercial energy storage systems applications that store solar and wind energy to ...

Almost all of the systems - 92% - had a capacity of less than 20 kWh, 99.9% were twinned with solar panels, and 99.1% were home installations. Anie reported Italy added 168,550 energy storage units from January to the end of September 2024, with a total rated power of 1,591 MW and a capacity of 4,387 MWh.

Italy's Anie said the boost for small-scale energy storage systems provided by the country's renovation "superbonus" is over. The tax credit, which initially offered a 110% rebate for the cost of qualifying energy ...
