

What solar charging is good for outdoor use

Which solar charger is best for camping?

The Goal Zero Nomad 50 is a larger solar charger that also wins our award for Best Solar Charger for Car Camping and Best Solar Charger for Basecamping and our Best Upgrade Solar Charger award. At 50 watts, it's the biggest and heaviest solar charger we tried.

Which solar charger is best?

The BigBlue SolarPowa 100 ETFE was the best value, providing great charging speed, light portability, and a low price tag. If you need to charge a phone or camera, see our portable solar charger review, which compares smaller and more packable panels.

What makes a good portable solar charger?

Great portable solar chargers prioritize size, weight, and packability over all else. These smaller models are designed to charge electronic devices with lower energy needs, like cell phones and smartwatches. But if you're trying to charge something that takes a lot of power, they won't work as well.

Are portable solar chargers a viable way to provide electricity outdoors?

Thanks to efficiency advances and cost decreases in solar cells, portable solar chargers are finally proving to be a viable means of providing electricity outdoors. A backcountry user might carry a smartphone, GoPros, headlamp, tablet, camera, headphones, and PLB or GPS devices.

Are solar chargers good for small electronics?

Learn More > Solar chargers can translate the sun's energy directly into power for small electronics. Whereas larger solar panels require a power station to play intermediary (lest you burn up your electronics), these smaller panels have just the right amount of kick for the likes of a smartphone or satellite messenger.

How many Watts should a portable solar charger charge?

Once you get an idea of charging capacity and your intended use for a portable solar charger, it's time to figure out what devices you plan on using. For smaller handheld items such as smartphones, a portable solar charger with five to fifteen watts should suffice.
