

Which RV should choose mobile power or battery

Should I use an alternate power source for my RV?

An alternate power source has many benefits for all types of campers. Here's how to choose a portable power station for your RV.

Can you use a power station while RVing?

Still, thanks to larger battery packs and more efficient solar panels, portable power stations have become viable options for use while RVing. Whether it's a primary source of power or a backup for your main generator, a power station can be a handy item to have at your disposal.

What's the difference between a leisure battery and a portable power station?

Whereas a leisure battery stays in your van, a portable power station can be taken wherever you go. They're also optimised for solar charging, making them an excellent companion for travelling off-grid. They can be used to add capacity to your campervan's electrical system, or to save your bacon in case of a malfunction.

Can You pack a portable power station for a campervan?

However, packing a portable power station for a campervan doesn't mean you can suddenly take your own 3000W electric kettle from your home kitchen on tour with you. You'll generally be using electrical items which run on less than 500W.

What are the best portable power stations?

You would also be taking the strain off your leisure batteries and backing up your electrical system in case of low battery levels or a malfunction. Our top picks for portable power stations are the Bluetti AC50B and the EcoFlow Delta 2 Max. These are both fully-featured, high-performance, and expandable with additional battery packs.

How do you charge a power station in an RV?

Fortunately, there are multiple ways to recharge most power stations. In addition to plugging them into an AC wall outlet at home, most models can also charge using the 12-volt DC port found in your RV. The majority of these devices can also be powered up using a solar panel, which is handy when used in the field.
