Can you use adhesive on solar panels?

I strongly urge you to avoid using any adhesive for solar panels. Keep in mind that flexible solar panels don't last long. You will probably need to replace them every couple of years. That will be a challenge with them glued in place. For rigid panels, the best adhesive would be M6 bolts. These are rigid panels being mounted on aluminium brackets.

Can you spray glue solar panels?

If using spray glue, ensure that you have a reasonable distance between your hand and the solar panel not to create any droplets that could interfere with electrical contact. You will need to press down hard on both sides of each panel, just enough for it to stick but not too much that you damage the cells!

Does 3M adhesive work on flexible solar panels?

3M also has an adhesive spray that works well for fixing flexible solar panels. It's the 3M Hi-Strength 90 Spray, which can bond metal and flexible panels. It's advertised as extremely strong, and it's easy to use as a spray. Remember that it is crucial to have both surfaces perfectly cleaned before applying any glue or adhesive to them.

What is the best adhesive for rigid panels?

For rigid panels, the best adhesive would be M6 bolts. These are rigid panels being mounted on aluminium brackets. I'll actually be replacing one of the factory panels and notice they only use adhesive. M6 bolts make sense for strength, my concern is they introduce an entry point for moisture.
