

Which type of roof terrace solar power supply is better for home use

What types of solar panels are available for pitched roofing?

As always, the team at AccuRoof are here to help. There are two main types of solar PV systems available for pitched roofing; in-roof (commonly used for new build projects) and on-roof (commonly a retrofit product). In roof solar PV, also called 'roof-integrated solar' the solar arrays are installed flush with the roof finish.

Can you put a solar panel on a thatched roof?

Thatched roofs are not suitable for solar panels. There's no mounting system designed for thatch, which wouldn't be ventilated well enough underneath the panels and so would rot. And given that thatched roofs already present a fire risk, putting an electrical system on top wouldn't be sensible!

Is a roof a good choice for solar PV?

However, if the circumstances are correct, a roof is a good choice for siting solar PV as it can make use of an otherwise underutilized space. There are solar PV systems available for all building types, from domestic to commercial, education to industrial buildings. The expanding solar market can be confusing.

What is a solar roof system?

The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics. With an on-roof system, the panels are clearly added on as an afterthought and are not integrated into your home.

Can a solar PV system be placed on a roof?

Depending on your energy requirements, sustainability objectives, and budget, a solar PV system can be placed anywhere, including on the ground or even on pitched walls. However, if the circumstances are correct, a roof is a good choice for siting solar PV as it can make use of an otherwise underutilized space.

Can solar panels be installed on a flat roof?

Flat roof mounted solar PV systems can be mounted on the roof structure via fixings which penetrate the waterproofing. The PV array is installed onto a rail system with hard point fixings into the structure, through the waterproofing layer. Engineered fixings are available for all common roof coverings.

Photovoltaic mounting systems from TRITEC enable the simple and quick installation of solar systems on all roof types. -> PV Show mounting systems
