

Which year was the battery 2108 produced

What is a Chinese battery date code?

Chinese battery date codes typically use a different format than other manufacturers. They often feature four characters, with the first two indicating the year and the remaining two representing the week number. For example, a code of 2124 represents the 24th week of 2021.

Does a battery have a manufacture date?

Yes, there is a manufacture date on batteries. The date is stamped on the top of the battery and is almost always the first number and first letter. The first number is the month and the letter is the year. For example, if the code is 3L, the battery was made in March of 2013. If the code is 11J, the battery was made in November of 2010.

What does 8d mean on a car battery?

The date on top of a battery corresponds to the year and month of manufacture. The number corresponds to the year and the letter corresponds to the month. So, if you see an 8D on your battery, it means that it was manufactured in April 2018. Along with, the number on a car battery corresponds to the year it was made, with 8 meaning 2018.

How do you find the production date of a Napa battery?

To find the production date of a NAPA battery, you can decipher the serial number. The first two digits of the serial number represent the month of manufacture, while the next two digits represent the year of manufacture. How do you determine the expiration date of a battery from its code?

What is a year code on a Deka battery?

Here, the year code is a number, followed by a letter for the month. For example, in the following code 6JXYZ1235678, the six stands for 2016, while J means October. On Deka batteries, there will be a code either on a sticker or stamped on the side. Again, you are only interested in the first two characters, a letter followed by a number.

How do I know if a battery was made in 2023?

For instance, a code like 'A3' would suggest that the battery was manufactured in January 2023. It's important to note that the exact format can vary between manufacturers. Some may use different coding systems, so it is beneficial to check sources like the manufacturer's website for specifics.
