

Why should you install a solar energy system?

Solar panels draw their energy from the renewable resource that is our sun. Not only does installing a solar energy system reduce your reliance on fossil fuels (which improves your air quality and protects the environment), but it can also save you \$25,000 to over \$110,000 over its lifetime.

Why do people buy solar panels?

If you're weighing up whether to take the plunge, here are the top reasons people gave us for adding solar power to their home. Being more environmentally friendly and combatting the high cost of grid electricity were among the biggest reasons people bought solar panels, according to our recent survey.

What are the benefits of solar energy?

Not only does installing a solar energy system reduce your reliance on fossil fuels (which improves your air quality and protects the environment), but it can also save you \$25,000 to over \$110,000 over its lifetime. Most people go solar for economic benefits, but the other benefits of solar may pleasantly surprise you.

Are solar panels a good investment?

Using electricity generated by your solar panels guarantees that your home is running on renewable power. This isn't the case for renewable electricity tariffs sold by energy suppliers. Adding solar panels improves the energy performance of your home, too, and can boost your energy performance certificate (EPC) rating.

Should you add solar panels to your home?

This isn't the case for renewable electricity tariffs sold by energy suppliers. Adding solar panels improves the energy performance of your home, too, and can boost your energy performance certificate (EPC) rating.
