

As Yellen laid out plans to formalise dialogue with China over excess industrial capacity in electric vehicles (EVs), solar panels and batteries, saying Washington would not accept U.S. industry ...

The oversupply of cheap Chinese solar panels is on US Treasury Secretary Janet Yellen's radar as she heads to China on Wednesday for meetings with top Chinese officials. The visit is her second trip to China in the past 12 months. "During her engagements in China, Secretary Yellen will advocate for American workers and businesses to ensure they are ...

U.S. Treasury Secretary Janet Yellen, set to visit China this week, plans to warn Beijing of the harm done by subsidies for clean energy products including solar panels that she says are flooding ...

Yellen said she believes those subsidies will enable China to flood the markets for solar panels, electric vehicle parts and lithium-ion batteries, thus distorting production in other economies ...

All US-made solar panels featured only imported solar cells until now, but two US manufacturers just struck a three-year, \$400 million deal. ... US Treasury Secretary Janet Yellen, who visited ...

A solar panel cost 11 US cents per watt at the end of March, or just half the price it was at the same time last year, according to BloombergNEF, and was expected to fall further in a "race to ...

But a flood of solar imports at artificially low prices due to heavy foreign government subsidies made it too hard to compete, and Suniva filed for bankruptcy in 2017. It wasn't alone. Before this Administration, solar companies across the United States were struggling. Between 2016 and 2020, nearly 20 percent of solar manufacturing jobs were ...

Janet Yellen warns China against "dumping" solar panels, batteries and EVs. US Treasury secretary tells Beijing its trade practices will distort markets and harm workers. The warnings from Yellen come as the Biden administration tries to drive investment into ...

Treasury Secretary Janet Yellen on Wednesday warned that China is treating the global economy as a dumping ground for its cheaper clean energy products, depressing ...

Solar is even more obvious import. 10c/watt solar panels is less than 10% of the cost of solar power projects. The other 90% is provided by US labour and materials. Both these sectors provide Americans with affordable power and ...

She said on the way to the meetings that she would "not rule out" raising trade barriers to protect

manufacturers of green tech, including batteries and solar panels, from Chinese competition.
