

What are Zenergy's new battery products?

At the same event, Zenergy unveiled four new class-leading battery products. Of them is a battery for aviation use that has an energy density of 320 kW and can get 80 percent charged in 15 minutes. Another is a storage battery, whose capacity reaches 314 Ah and energy density stands at 180 Wh/kg.

What's new at Zenergy's Changshu plant?

The Changshu plant is a "software-defined" facility, which among other things can cut its response to client orders by 50 percent and improve its efficiency by 33 percent, said the battery maker. At the same event, Zenergy unveiled four new class-leading battery products.

Where is Zenergy's new battery plant located?

Zenergy's new battery plant starts operations in Changshu, Jiangsu province, on May 9, 2023. [Photo provided to chinadaily.com.cn] Chinese battery maker Zenergy's new 25 GWh plant has started operations in Changshu, Jiangsu province, which is expected to help it better meet the growing demand in China, one of the world's largest battery markets.

Why is China developing the NEV battery industry?

As the largest developing country, China has been adhering to the spirit of "pursuit of excellence" and has invested a lot of manpower and material resources in science and technology innovation, and the NEV battery industry is just one of the projects. The Chinese government has introduced support policies to develop this industry successively.

Is China a leader in battery innovation?

In contrast, China's rapid rise in battery innovation has been accompanied by a sharp decline in the number of Chinese patents involving foreign collaborations (13.2% to 6.6%). Battery innovation in Japan and Korea is dominated by large companies, while the U.S. is dominated by SMEs and universities or research institutions.
